

Future Energy ... Today

SolPark™

Green Solution

SolCool™ Systems are Solar PV Systems that are installed on Parking Shades and generates electrical power directly to your local grid using Solar PV Technology during daytime.

SolPark™ saves your monthly electrical bill and is the right step that paves the way for commercial Solar Energy applications.

Operation

Solar Modules are installed on top of Parking Shades replacing conventional metal shades. The system works by generating electricity during day time, feed it directly into your local grid reducing your dependant on the National Grid.

SolPark™ PV Solar System has been designed to provide seamless power supply to your building during Daytime. It consists of World-class quality PV solar modules which generate electricity and Grid Inverters that convert DC Current to AC Current and Synchronize with your local electrical Network.

SolPark™ is a Green Power Solution for your facilities; additionally it is a “Fix-n-Forget” system that is virtually free of maintenance charges.

Plot 71, Sixth Industrial Area, 6th of October City, Egypt.
