

TripleO™ Home Solar Systems

Future Energy ... Today

Power your Home with OneraSystems **TripleO™** PV Solar Systems and well comfortably Any where Away from the Grid

Our **TripleO™** home PV Solar Systems are tailor-designed to provide power for homes not only in remote areas where grid is either absent or deficient but to reduce dependency on grid power as well, whereby to minimize cost and efficiency at times where electricity is unstable during summer time.

Cost Conscious

The **TripleO™** operates at Zero noise, Zero emissions and Zero fuel, complementing your pursuit of natural tranquility in your remote domicile. Even with the Availability at times where few seconds of grid power failure cost more than 100 electricity bills.

Applications

- Farm residence
- Weekend homes
- Remote dwellings
- Villas and townhouses

Stand Alone System

All about Time

The **TripleO™** homes will be able to receive free electricity in a period ranging from 2 to 5 years depending on typical home consumption and depending on average fossil fuel prices. However, as oil prices have significantly increased over the past period and will continue to do so, electricity cost will inevitably rise beyond expected levels coupled with subsidy removal home systems will provide electricity at Zero cost in less than 3 years.

The **TripleO™** consists of World class quality modules which generate electricity, batteries to store energy, controller to regulate voltage and protect batteries While Charging and discharging and an inverter to transform DC to conventional AC for Special purposes.

Plot 71, Sixth Industrial Area, 6th of October City, Egypt.
